How I Help Your Business

Hire me if you need a passionate and opinionated software developer eager to understand the domain and the customer's needs. I combine fast minimal viable experiments, grounded decisions, curiosity to understand depth, team work, and software development life cycles to deliver on promises that requires responsibility and communication.

Education

TU Delft 2024 — 2026
MSc in Computer Science Delft, Netherlands

- GPA: 8.5/10
- Topics: Programming Languages, Computer Graphics, Quantum Computing, Geodatabases,
- Master Thesis: Deadlock Handling Strategies on Quantum Network Nodes

NTNU 2021 — 2024
BSc in Computer Engineering Trondheim, Norway

- GPA: 4.76/5
- Topics: Software Engineering and Software Development Life Cycles
- Bachelor Thesis: A Tool to Analyze Verifiable Credentials (eIDAS 2.0)

Work Experience

Full-Stack Developer June 2022 — Present
Telescope Oslo

- Co-founder of Telescope building the backend foundation of the entire application still used to this day
- Built the product allowing the company to raise 37 Million NOK
- Specialized in automating GIS analyses, but responsibility over all parts of the stack

Student Representative for Software Engineering NTNU 2023 — 2024
NTNU Trondheim

- Student representative in the evaluation committee for my study programme, performed every 5 years

Voluntary Experience

Developer, Lead Developer, Deputy Commander and Commander Jun 2021 — May 2024
Hackerspace NTNU Trondheim

- Grew the tech team from 3 to 10 engaged members contributing to our digital infrastructure
- Upgraded managed servers with backups, monitoring, security, physical move, and (unfinished) matrix communication.
- Strengthened Hackerspaces' position to keep funding for longer
- Lead an organization growing from 10 to 30+ members

Developer 2021 — 2022
TIHLDE Index Trondheim

- Worked in a software development team for the study's student organization.
- Took part in the Backend development of collectible website achievements, strikes for missing events, the gallery, a capture-the-flag event, and continuous bug fixes.

Reference Groups - Dialog between students and professors

For the courses: Software Development 2 with agile project, Network Programming, and Machine Learning
